

NIVEDITHA K

Frontend Developer

Bangalore, India | +91 9448238530 | niveditha.mpn@gmail.com

GitHub: Niveditha02 LinkedIn: nivedithakokkapuni

Professional Summary

Frontend Developer with 2+ years of experience building scalable and user-friendly web applications using React.js, JavaScript, HTML, and CSS. Skilled in developing responsive, component-driven interfaces, integrating REST APIs, and optimizing performance for production systems. Strong collaborator with experience in translating business requirements into technical solutions and delivering high-quality UI in fast-paced environments.

Technical Skills

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Web Concepts: Responsive Design, Mobile-First Development, Component-Based Architecture
- APIs: RESTful APIs, API Integration
- Tools: Git, GitHub, Postman, Chrome DevTools, VS Code
- Data Visualization: Chart.js, Real-time Dashboards, Web-Sockets (SSE)

Work Experience

Crest Aerospace Technologies

Software Engineer

Bangalore, India

July 2025 – Present

- Designed and developed user-friendly web interfaces supporting 5+ user roles with dynamic component rendering.
- Translated business requirements into technical specifications and reusable React components.
- Integrated 30+ RESTful APIs for real-time monitoring and workflow management.
- Built scalable component-based architecture to improve maintainability and development efficiency.
- Collaborated with cross-functional teams and optimized performance by reducing re-renders and handling large datasets efficiently.

Crest Aerospace Technologies

Software Engineer

Bangalore, India

July 2024 – June 2025

- Developed responsive and mobile-first web applications using React.js, Tailwind CSS, and modern JavaScript.
- Built reusable UI components using React Hooks and Context API for scalable development.
- Integrated RESTful APIs to deliver dynamic and real-time user experiences.
- Improved application performance and responsiveness by identifying and resolving UI bottlenecks.

Crest Aerospace Technologies

Software Engineer

Bangalore, India

July 2023 – June 2024

- Built interactive and data-driven web interfaces using React.js and modern JavaScript (ES6+).
- Integrated RESTful APIs with efficient async handling for seamless data updates.
- Developed responsive UI components ensuring mobile-first and user-friendly design.
- Debugged and resolved UI issues to improve application stability and performance.
- Worked closely with backend teams to align API responses with frontend requirements.

Education

Canara Engineering College

Bachelor of Engineering in Electronics Communication - CGPA : 8

Mangalore, India

Projects

- Digital Product Passport:** Built data-driven dashboards for supply-chain traceability using React and Tailwind. Developed role-based UI, integrated 30+ REST APIs for real-time monitoring, and implemented secure OTP/JWT flows. Improved navigation clarity by 45% and reduced workflow friction by 30%.
- Scoreboost:** Developed a data-driven SaaS platform with real-time exam flows, synced timers, and interactive dashboards using React and Tailwind. Integrated REST APIs and built reusable components, improving accessibility by 40% and boosting engagement.
- EducateTrade:** Designed a real-time trading platform with interactive dashboards and simulators using React and modern JavaScript. Integrated APIs for live data visualization and improved performance, increasing engagement by 35% while enhancing accessibility.
